AED Plus®
A Full-Rescue AED for Professionals
ZOLL AED Plus Professional Interface

The AED Pluss® is available with a professional interface that includes minimal front-panel graphics, yet still provides the necessary voice and text prompts for a full rescue. It is the first and only automated external defibrillator (AED) that guides rescuers through the complete Chain of Survival.

When a victim collapses from sudden cardiac arrest, rescuers do not know whether defibrillation or CPR is the appropriate therapy until an AED is attached and the victim’s heart rhythm is analyzed. About half of all cardiac arrest victims that suddenly collapse initially require defibrillation. For other victims, however, who may have non-shockable heart rhythms, the critical action for survival is effective CPR.

The AED Plus is the only AED with Real CPR Help®. It helps rescuers perform effective CPR because it allows them to see and hear how well they are performing the rate and depth of chest compressions during CPR. This realtime feedback mechanism makes the AED Plus the only AED that can help assess and treat nearly every sudden cardiac arrest victim, making it the only Full-Rescue AED available today.

Five-Year Shelf Life

Infrequently used AEDs demand electrodes that require infrequent replacement. Most AED electrodes on the market today will corrode or expire before they are used. ZOLLs® CPR-D-padz® is designed to control corrosion and allow for an unmatched fiveyear lifespan. This reduces electrode replacement costs, facilitates AED readiness and maintenance, and decreases the probability of an AED failure due to electrode expiration.

In addition, the CPR-D-padz comes complete with barrier mask, scissors, disposable gloves, prep razor, towel, and moist towelette.
